

DEVERRA 100

HA body

DEVERRA

HA body

DEVERRA 100, the highly purified viscoelastic body filler, is the best solution for replenishing body volume and professional body contouring. It is natural substance optimized to suit human skin tissue.

- Optimal Cross-linked HA and Our unique cross-linking technology does not need adding free Hyaluronic acid to adjust the gels physical properties.
- Visco-elasticity is one of the most critical elements that determine longevity.

The volume, elasticity and molding ability of the gel has been optimized by the level of visco-elasticity per product according to use and treatment area.

DEVERRA 100 ensures longer-lasting and stronger support for skin structure.

DEVERRA HA body Filler restores volume to the body in areas like breasts, power legs, and buttocks.

It is also efficient in combating cellulite and uneven skin surfaces due to liposuction procedures.

One session of DEVERRA HA body Filler is enough to provide a long-term result from the procedure for up to two years.

Hyaluronic acid in DEVERRA HA body Filler has the highest level of purification for maximum safety, leaving minimal residue of cross-linking agent, endotoxins, and proteins.

Specifications

Product name	DEVERRA 100
Packing Unit	100 ml vial/leaflet
Main Ingredients	Cross linked hyaluronic acid
HA Concentration	24 mg/ml
BDDE	<0.2ppm
Gel type	mono - phasic
Lidocaine	0.3%
Expiration Date	Check the box for the expiration date
Storage	Store at room temperature (1°C - 25°C), protect from direct sunlight

Benefit

- DEVERRA 100 HA body Filler has strong cross-linking and high viscosity that ensures a longer effect
- Contains highly-purified stabilized hyaluronic acid
- Has higher viscosity that prevents deformation
- Small HA particles enable easy molding of desired shape
- Smooth and cellulite-free skin
- Suitable for patients, who are not intended to go through surgery, but desire to enlarge volume in areas like breasts and buttocks
- Hyaluronic acid gel does not contain animal components, eliminating the risk of allergic reactions
- No incisions or scars
- Quick recovery period (compared with plastic surgery)
